Introduction

This map depicts the historical and modern geology of the Quadrangle. The map is based on the topographic map Series: 1 inch = 500 feet/30 meters quadrangle. The topographic map was originally published in 1965. The map is available as a digital file on the Arkansas Geological Survey website. The map is available for download in various formats, including PDF and raster images. The map is designed to provide a comprehensive view of the geological features and landforms of the area. It includes important geological information, such as rock types, stratigraphic units, and structural features. The map is useful for a wide range of applications, including land use planning, environmental assessments, and geological research. The map is updated regularly to reflect the latest geological data and information. The map is available for download at the Arkansas Geological Survey website.
