DIRECTORY OF MINING OPERATIONS

IN ARKANSAS BY COUNTIES

ARKANSAS

ARKANSAS GEOLOGICAL COMMISSION
3815 West Roosevelt Road
Little Rock, Arkansas 72204

Nov 14 - 1962 Independence County

Freshour Bros - Sweet Home Ave.
Operating under name of "Rocky Point Quarry"
Limestone Quarry

In operation: 3 months

Making Ag Lime

Jaw Crusher - 32" size

Goes to Hammer Mill

Made own power with Diesel Power Unit

Quarry 48 ft deep

100 ft wide

150 ft long

Lower 20 ft of lime is used

Sells ag lime to local farmers

Sec. 14, T12N R6W

Not operating quarry this date -

Wanted some equipment to Rosebud to get out small
tonnage road rock

RECORD OF MINERAL ANALYSIS

Sample No. 2327

Date 9-25-62

9/20

From: Clarence Sutton

Report to JWC

Letter Accompanying: Yes No File Under _____

Location: County Sevier Sec. 36 Twp. 10S Rge. 30W

Mineral Suspected By Sender: Glass Sand

Kind of Material: Tobio Sand

Test Recommended For: SiO₂ Fe₂O₃ Loss

By: J.W. Crouch

ANALYSIS

①

Raw Sand

②

Washed Sand

SiO ₂	89.44	%
Fe ₂ O ₃	0.61	
Al ₂ O ₃ + other oxides	9.07	
Loss on Ign.	0.88	

92.16	%
0.27	
7.09	
0.48	

Analysis By: V. Carney

Date Completed: 10-1-62.

Remarks:

Reason for examination.....

Engineer accompanied by..... Address.....

Extent of property 130 acres.....

Owner Consolidated Chemical Industries Inc. 5741 Stuffer Chemicals Address C. J. Ackerman Subst. Berger - Ark.

Leased or optioned to..... Address Houston Texas

Location of property (be specific) Sec 2 T1N R12W

also 8 acres in Sec. 25 T1N R12W

Type of deposit and mineralogy (brief description) Bauxite + clay

Known dimensions of the deposit
2 open pits same size 150 ft apart
Length 600 ft Width 400 ft Depth 100 ft

Attitude of the deposit (strike, dip, etc.).....

Plant in Sec 4 T1S R12 W

Possible extensions; correlation of known showings.....

overburden 45 ft. Clay over bauxite 15 ft thick Bauxite 10 ft thick

Mine workings (brief description or attach map or sketch) (indicate whether accessible).....

open pits

Mining and milling equipment on property *Mining is by contract - McGeorge Cont Co.*

Has been operating 15 years.

Past production (if any).....

Present rate of production (if any) *25,000 tons per year*

Will probably go to 40,000 tons in future

Sampling (describe briefly, or attach sketch).....

new kiln put in 1962 - This will increase production

Tentative Estimate of Reserves

(Subject to revision when assays are received or after engineering calculations)

Measurable..... tons..... Grade.....

50,000 tons barite

Indicated..... tons..... Grade.....

1,000,000 tons clay

Inferred..... tons..... Grade.....

Clay will average 40% Al₂O₃

Mining method (actual or suggested).....

Burkettwell average 52 to 55% Al₂O₃

Milling or processing method (actual or suggested).....

2 Rotary Kilns 8x108

Processing tests suggested.....

*Most of production to make alumina 80% - go to Bestrock La
Springhill La
Counce Tenn.
20% activated barite - sent to Milwaukee Co.*

Tentative conclusion and decision.....

*Install 2 rollers - 2 crushers - 1 Hammermill
magnetic separator*
