Mineral Survey Begins
In Franklin County
3-10-38

A mineral survey program has been announced by the Arkansas Geological Survey and the State Highway Department to investigate the mineral resources of Franklin County. This project is being conducted to provide for the development of mineral resources and to train personnel to locate and identify mineral deposits. The project is supported by the WPA (Works Progress Administration) and is expected to last for several years.

The survey will focus on the identification and mapping of mineral deposits, particularly coal and other fossil fuels. The data collected will be used to produce a map of the mineral resources of Franklin County. The survey will be conducted by a team of geologists and other professionals experienced in mineral exploration.

The survey is expected to take several years to complete and will provide valuable information for future development of the mineral resources of Franklin County. The results of the survey will be made available to the public and will be used to guide future mineral exploration and development.
