Texas Oil Operators Plan Test in Hot Spring County.

Special to the Gazette.

JULY 24—Claybrothers of Vernon, Tex., will drill for oil in Hot Spring County between Malvern and Little Rock for the first time in several years, this company having lately announced plans for test drilling.

Mr. Claybrothers, who was working the past June near Malvern, is expecting to have his rig here within the next few days. The rig is equipped with the latest machinery and will be ready in a few days for the test. The company has already made a large investment in the project, and it is expected that the test will be successful.

The location of the test is in the Red Dog field, about six miles south of Malvern, and is said to be one of the most promising fields in the county. The company is planning to drill a well to a depth of 1,500 feet, and it is expected that the oil will be found at that depth. The test will be conducted by a team of experienced drillers, and every precaution will be taken to ensure the success of the venture.

Mr. Claybrothers is said to be a successful oil producer, and his company has a large number of wells in operation in various parts of the state. The company is well known for its efficient operations and its ability to find oil in the most remote locations.

The test will be closely watched by the oilmen of the area, and it is expected to be a turning point in the oil industry in Hot Spring County. The test will be conducted in the spirit of cooperation and progress, and it is expected that it will be a success.

Mr. Claybrothers is said to be a hardworking man, and his company is said to be one of the best in the state. The company has a good reputation for its work, and it is expected that the test will be a success.
