Oil Driller Hit Paraffin.

First Oil Well Near Carisle Well May Cause Sensation.

Cardille.—A request for paraffin was reported received Thursday afternoon in the Silver well, near Carisle, when oil was seen coming from below the 1,600-foot mark near Carisle. This information is regarded as valuable, indicating oil and gas possibilities.

A paraffin bed is said to be a good indication that oil will be encountered, and that if found it will hold a refinery, which would mean a higher and higher quality oil, as well as a much larger production in Arkansas.
