**Asks Interest In Miller County Well**

**Gazette 7-2-1907**

Special to the Gazette.

By J. W. Woodall.

The suit involving around $1,000,000 in claim to the discovery well for the Miller County field will be tried by Judge McCranley later this month. The suit involves an undivided sixteenth interest in the fields, valued at approximately $250 acres owned by McCranley.

**Minute Arranged Black.**

Says the suit is no more a case for trial than the discovery well was a case for drill. The trial will be a case for trial as the discovery well was a case for drill. The trial will be a case for trial as the discovery well was a case for drill.

Two Oil Wells Near Arkansas Line Completed.

Two oil wells near the Arkansas line were completed recently.

The drilling of the wells was done under the supervision of E. D. Roldan, of the D. C. C. Company, and the wells were tested by the same company.

The wells are located about three miles north of the Arkansas line, and are said to be of the oil-bearing type.

Oil Firms To Buy Less In Miller County Field.

The oil firms are buying less in the Miller county field, according to a report from the Miller county oil company.

The report states that the firms are buying less because of the low price of oil, and that the price is expected to remain low for some time.

South Miller Oil Field Extended.

The South Miller oil field has been extended, according to a report from the South Miller oil company.

The report states that the field has been extended to the west, and that the extension is expected to increase the production of the field.

Three Special Permits Issued In Miller.

Three special permits were issued for wells in Miller county, according to the state board of oil and gas.

The permits were issued for the drilling of wells in the area of the Miller county field.

New Test May Be Good For 3,000 Barrels.

A new test well may be good for 3,000 barrels of oil, according to a report from the Miller county oil company.

The report states that the test well was drilled in the area of the Miller county field, and that the test was successful.

Cotton Belt Surgeons To Test Three Wells.

The Cotton Belt Surgeons have decided to test three wells in the area of the Miller county field.

The tests will be conducted to determine the oil content of the wells and to determine the feasibility of drilling in the area.

New Producer Brought In.

A new producer has been brought in to the Miller county field, according to a report from the Miller county oil company.

The new producer is located in the area of the Miller county field, and is said to be of good quality.

**DEVELOPING NEW OIL FIELD SOUGHT**

Texarkanian C. C. Trying to Assist in Negotiation of Leases

By FLEETCHER CHENault

Staff Correspondent of the Gazette.

Texarkanian, July 31—The temporary vacation of the crew at the Lens well is expected to be over today by a late inspection of the field by Col. Charles V. Lucas, vice-president of the company in charge of the projects. The field will be in full swing by Monday morning.

No Developments in Miller County Field

Special to the Gazette.

Texarkanian, Aug. 2—Three wells were pumped today and one was not ready for testing. One of the wells will be ready by Monday, and the other two will be ready by the end of the week. The field is expected to produce about 300 barrels of oil per day.

Financial arrangements are underway for removal of work on the Texarkanian field near New Boston, Texarkanian, which is reported to have one well ready for testing. The field is expected to be ready by the end of the month.

Rumors of New Wells Prevalent at Texarkanian

Special to the Gazette.

Texarkanian, Aug. 1—The Lens well is reported to be ready for testing by the end of the week. It is expected to produce about 500 barrels of oil per day. Other wells are expected to be ready by the end of the month.

New Texarkanian Oil Company to Have Rig Up by Saturday

Special to the Gazette.

Texarkanian, Aug. 11—The newly organized Texarkanian Oil and Gas Company, composed of local men, will have a driller and the rig ready for drilling about four miles southwest of the site of the Texarkanian field. The drilling will be started on Saturday.

First Core Test Well Near Indexed

Special to the Gazette.

Texarkanian, Aug. 11—The Texarkanian Natural Gas Company, with headquarters in Fort Worth, has announced that it will drill its first test well on the property. The well is expected to be ready by the end of the month.

The Lens well is located on the river bottom of the Red River, about five miles north of the producing area of the field. The well, which is expected to produce about 300 barrels of oil per day, is expected to be ready for testing by the end of the month.

**Relation of Lens Well to Producing Area and Depth of Trinity Formation**

Two publications which are now available from the Arkansas Geological Survey and which are of value in locating the oil field are the following:

- "Intrusive and Extrinsic Geologic Features of the Arkansas Oil Field," by W. C. Spooner, which will be submitted to the printer this month.
- "Intrusive and Extrinsic Geologic Features of the Arkansas Oil Field," by W. C. Spooner, which will be submitted to the printer this month.

Maps Explained

The accompanying maps are taken from the Arkansas Geological Survey map of the "Intrusive and Extrinsic Geologic Features of the Arkansas Oil Field." The maps show the location of the oil field and the depth of the Trinity Formation.

**Noted Operator to Drill For Miller in County**

By M. H. M. McNeil

Noted oil field operator, who also is negotiating for a lease, estimates the flow in the Lens well. Mr. Lucas, who is a veteran in the oil game, said he is very hopeful of the well. The lens well will be in the anticipated depth of oil in about four years at which time it is said good oil beds were found.

Hope Turns From Watermelon Festival to Industrial Activity.

DEVELOPMENT INDICATED

Co-operation Sought for Further Drilling Campaign in Miller County's Production Territory.

BY FLETCHER CHENELLY

Athens, Aug. 28—Hope's push for a bigger industrial development in its watermelon festival territory is being welcomed by those who have seen the fruits of a similar campaign in Little Rock.

According to the latest reports, the town has already seen a 500% increase in the number of watermelon farmers in the past year, with a corresponding 400% increase in the number of watermelon-related businesses.

If Hope wants to see a similar push in the industrial development, it must start small, with a focus on attracting small businesses and entrepreneurs.

TheHope Chamber of Commerce is already working on a plan to attract small businesses, and the town has already seen a 200% increase in the number of small businesses in the past year.

The plan includes offering tax incentives and grants to small businesses, as well as creating a small business incubator to help new businesses get started.

The town is also working on a plan to attract entrepreneurs, with a focus on those who are interested in starting their own businesses.

This includes offering mentorship programs and providing access to funding.

The Chamber of Commerce is also working on a plan to attract tourists, with a focus on creating a more welcoming and friendly environment for visitors.

This includes creating a visitor center and providing information on local attractions and events.

The town has already seen a 100% increase in the number of visitors in the past year, with a corresponding 200% increase in the amount of money spent on tourism.

In summary, if Hope wants to see a similar push in the industrial development, it must start small, with a focus on attracting small businesses and entrepreneurs, and creating a welcoming and friendly environment for visitors.
Hopes High for Good Producer at E. and F. Well

Drilling operations continue unabated around Texarkana.

Texarkana, Oct. 15—Encouraging reports of oil Company in Fitzwater-Beck No. 1, well received here yesterday. The discovery well in Miller County, 16 miles east of Texarkana, is making good progress, reaching a depth of about 2,500 feet.

This is the tenth well to be drilled in the area, and the oil company has continued its successful drilling operations in the area.

New Oil Discovered in Texarkana Well

Drilling Operations Continue Unabated Around Texarkana.

Texarkana, Nov. 8—Oil drilling activity in the area continues to be active, with several wells reaching significant depths. The company has made significant progress in the search for oil, with several wells showing promising signs.

New Well in Texarkana Field

Drilling Operations Continue Unabated Around Texarkana.

Texarkana, Dec. 1—Another well is being drilled in the area, with high hopes for success. The well is located near the center of the oil field, and the company is optimistic about its potential.

New Oil Field Discovered in Texarkana

Drilling Operations Continue Unabated Around Texarkana.

Texarkana, Jan. 1—A new oil field has been discovered in the area, adding to the growing number of oil wells in the region. The field is located near the center of the oil field, and the company is planning to drill additional wells to fully explore the potential of the new field.

Drilling Operations Continue Unabated Around Texarkana.

Texarkana, Jan. 9—Drilling operations continue unabated around Texarkana, with several wells reaching significant depths. The company is optimistic about the potential of the new field and continues todrill additional wells to fully explore the area.

New Oil Field Discovered in Texarkana

Drilling Operations Continue Unabated Around Texarkana.

Texarkana, Jan. 22—Another well is being drilled in the area, with high hopes for success. The well is located near the center of the oil field, and the company is optimistic about its potential.

New Oil Field Discovered in Texarkana

Drilling Operations Continue Unabated Around Texarkana.

Texarkana, Jan. 31—A new oil field has been discovered in the area, adding to the growing number of oil wells in the region. The field is located near the center of the oil field, and the company is planning to drill additional wells to fully explore the potential of the new field.
Drilling Will Be Resumed in Texarkana Area.

Special to the Gazette.
Texarkana, May 28.—Drilling for oil will be resumed in the Lens discovery section, 16 miles east of here, following the lifting of the cease from the X. E. P. and M. Co. over the well at Fairmont, No. 2 in a few days. The Fairmont No. 2, a new well financial success for the company, has been completed and is now ready for drilling. The lease is one of the richest in the country, and the company is anxious to get it on the market as soon as possible.

A new lease will be posted on the property, and the company is now preparing to drill the well.

New Oil Well Being Drilled at South of Texarkana.

Special to the Gazette.

Drilling Boom In Miller County Seen

Gazette

Special to the Gazette 5-19-37

Drilling for oil in Miller County is at a record high, and the field is expected to surpass last year's production, when more than 100 wells were completed. The increase in drilling activity is attributed to the discovery of several new oil-bearing zones in the area.

Oil Field Men Watch New Test Drilling

McClanahan Well Strikes Spectacular at 6,060 Feet.

Texarkan - Oil activity in Miller County has reached an all-time high, with operators tapping into new oil-bearing zones. The McClanahan Well, located in Texarkan, hit a spectacular depth of 6,060 feet, marking the deepest drill of the year. The well is expected to become a major source of oil for the region.

McClanahan Well Making 5,000 Barrels

Texarkan, Ark. June 24 - The McClanahan well in Texarkan is now making 5,000 barrels of oil per day, a significant increase from its previous output. The well was drilled by W. L. McClanahan and G. W. Cunningham, and is located on the western edge of the Rodessa field. The well's high production is expected to boost local oil revenues and stimulate further drilling activity in the area.

Miller County Well Swabbed

Miller County Field Rules Adopted

Gazette 6-27-37

Special to the Gazette

Miller County, Ark. - Field rules have been adopted in Miller County to regulate oil production and protect the environment. The new rules were the result of consultations between the operators and local officials. The rules are intended to ensure the safe and responsible extraction of oil from the county's reserves.

Rodesia Extension Across Line Brings Swift

Developments.

Texarkan - An extensive drilling campaign was in progress for South Arkansas Saturday as rigs were moved in to offset W. L. McClanahan No. 1, 11,600-ft. wild cat which blew in this week with an estimated production of from 2,000 to 5,000 barrels per day. The Miller Field has extended the rich Rodessa field two and one-half miles into Arkansas.

Well Making

Democrat 6-27-37

Making 5,000 Barrels

McClanahan well No. 1, which blew in for a 1,500-barrel producer Tuesday, increased to 5,000 barrels per day after acid was used to eat out lime from the producing zone. The well, located on the park tract in the northeast quarter of the mile northeast of the state line, is said to be the deepest well yet drilled in Arkansas.

A small quantity of the oil was being shipped to Dallas, Texas, while the well was being shut in until the well fully cleans up.

Well in Miller Near Completion-Miller Gets New Producer.

Shreveport, La. June 19 - The high production of the new Rodesia Field in Arkansas has been reversed by development work on a 1,400-ft. well near the southwest corner of the state. Refiners have reported that the well was completed a producer.

The well, located near the center of the southwest corner of the state, was drilled by the Arkansas Oil Company, which has been active in the area. The well has a capacity of 45,000 barrels per day, and is expected to be brought on line in the near future.

Miller County Well Swabbed

Shreveport, La. June 19 - The Rodesia Extension field in Miller County, Ark., is completing its second well, which has been targeted for a 1,400-ft. depth. The well is located near the southwest corner of the state and is expected to produce 45,000 barrels per day.

The well has been completed as a producer, and is expected to join the growing list of active wells in the Miller County field. The field has produced more than 100,000 barrels of oil to date, and is expected to continue its rapid expansion.

Oil Indicated in Miller Test

Democrat 6-29-37

McClanahan well No. 1, drilled at a depth of 5,000 feet, is showing oil in tests, according to reports. The well is located on the western edge of the Rodessa field, and is expected to become a major producer.

Oil Indicated

In Miller Test

Democrat 6-29-37

Shreveport, La. June 22 - The new McClanahan well in Miller County, Ark., is showing indications of oil in tests. The well, located near the southwest corner of the state, is expected to become a major producer.

Low production of the Rodesia field in the Arkansas and Louisiana border area has been reversed by development work on a new well near the southwest corner of the state. The well, located near the center of the southwest corner of the state, was drilled by the Arkansas Oil Company, which has been active in the area. The well has a capacity of 45,000 barrels per day, and is expected to be brought on line in the near future.

As the field extends further into Arkansas, more wells are expected to be completed, bringing the total number of active wells in the area to more than 100. The Miller County field is expected to continue its rapid expansion, with more than 100,000 barrels of oil produced to date.
Redessa Field Extension Into Arkansas Possible.

Canton—6-22-37

Shreveport, La., June 21—Extension of the Redessa field into Miller county, Ark., making it a tri-state field, occurred this afternoon as W. T. McClain's Texe No. 1, section 11-28-28, was swabbing 18 per cent oil with the other 82 per cent consisting of wash water and mud.

When operators went back into hole today, fluid stood at 2,790 feet, about 83 per cent of which was oil. The percentage of oil increased as swabbing progressed. The total depth is 3,815 feet. It is located two miles north of Redessa production, a half mile north of the Louisiana line. About 12 feet of sand was drilled. Oil men predict an extensive drilling campaign north of Redessa if the well produces.

The Gulf Refining Company today had by far the best offer considered to date in New Lisbon field of Claiborne parish, Louisiana, at its Henry 1, section 31-14-4, a half mile northeast extension. The well, with 36 feet of pay sand from 5,193-5,233 feet, during the first 18 hours made 828 barrels through a 27/64 inch choke.
