Jacksonville
To Be Scene Of Oil Test
Democrat 5-27-38

Texan to Spud in Monday Nine Miles Southwest of Cabot.

Cabot—The third well of the prospective Cabot oil and gas field is to be spudded in Monday, it was learned here Saturday, by the Coker Oil Company of Arkansas, organized by James H. Coker of Dallas, Tex., as president.

The location is in the area of section 36, 39, 51, nine miles southwest of Cabot.

Mr. Coker has had 15 years experience in the oil business and has producing oil properties in Texas. His company is said to control about 10,000 acres of lease, centering around Jacksonville. Coker said he expected to find production at not to exceed 2,000 feet.

The Bonnet No. 1 well, in the oil field, reached 1,477 feet Saturday and was in line. The rock was increasing in hardness. In view of the fact that skilled workers were encountered, yields increased, evidences of oil and gas as well as the well went down, drillers believe that the present limestone is pierced, something worth while is sure to develop.

At Edgington, test mile and a half north of the section lease, is a derrick with three foundation piles in place, machinery is being assembled and drillers should be turned over.

**Test Near City To Be Spudded In This Week Gazette 5-27-38**

A test for oil and gas will be spudded in on the M. Stone lease near Jacksonville early this week, James H. Coker of Dallas, Tex., president of the Coker Oil Company of Arkansas, and yesterday, the location is approximately 18 miles northwest of Little Rock.

The lease is located in the northeastern part of the county near the border with Little Rock. The lease is held by the Drillers, Inc., a company organized in Little Rock.

The leases were sold to the company by the town of Cabot, which is 18 miles northwest of Cabot.

**Oil Firm Secures Majestic 60,000 Ac. in County**

Oil and gas leases on about 10,000 acres in Pulaski and Lonoke counties in the vicinity of Jacksonville and Cabot have been acquired by the Coker Oil Company of Arkansas. The leases were sold to the company by the town of Cabot, which is 18 miles northwest of Cabot.

**Test for Oil Planned Near Jacksonville Democrat 6-5-38**

By H. C. BROOKS (Staff Correspondent)

At least one more oil well will be spudded in Cabot, it was learned in the area of section 36, 39, 51, nine miles southwest of Cabot. The Coker Oil Company, organized by James H. Coker of Dallas, Tex., is the company in charge of the project.

There is a possibility that the pool, which is the same pool that underlies the Pulaski region, may be found in the vicinity of Jacksonville.

**Coker No. 1 To Be Drilled At Once**

Special to the Gazette 10-2-38

Jacksonville, October 1:—Following completion of the drilling of the No. 1 well on the R. W. Turner farm two miles south of Cabot, the No. 1 well on the R. W. Turner farm was spudded in this week.

The drilling rig is considered oil capable of producing 6,000 to 8,000 barrels of oil per day. The company is operated by J. H. Coker, well-known Texas independent oil operator, and gives Arkansas. Mr. Coker is standing at the present location of the field.

Above is shown the lowering steel derrick and other modern equipment of the Arkansas Oil Company's new well 15 miles north of Little Rock, near Jacksonville, which will be spudded in this week.

The drilling rig is capable of going down 5,000 to 6,000 feet. The company is being operated by J. H. Coker, well-known Texas independent oil operator, and gives Arkansas. Mr. Coker is standing at the present location of the field.
OIL REPORTED OVERFLOWS ESTATE

Said to Bubble Over Top of Casing at Plant Test.

By Mrs. Richman

A bubble of 10,000,000 pounds of crude oil is reported to have reached the top of the oil well at the Plant test at Frazier Plantation.

The bubble was created by a mine explosion in the well, which set off a gusher of crude oil, causing a massive overpressure in the well.

The oil company, Richman and Co., is said to be working on a plan to contain the bubble and prevent further loss of oil.

OIL REFINERY MAY BE ESTABLISHED HERE

Site for Proposed Plant Is to Be Selected Soon, It Is Said

A definite decision on the location of a new oil refinery is expected to be made soon, according to recent reports.

The site is expected to be chosen from among several candidates, including the current plants in the area.

The new refinery is expected to increase the capacity of the local oil industry, providing a boost to the local economy.

OIL REFINERY WILL BE ESTABLISHED HERE

Company Formed to Operate Plant With 1,000-Barrel Capacity

A new company has been formed to operate a new oil refinery with a capacity of 1,000 barrels per day.

The refinery will be located near the current oil fields and is expected to be operational within the next six months.

The company, Richman and Co., has been granted permits and is currently working on the construction plans.

The new refinery is expected to create jobs and boost the local economy.
**Test Well at Woodson to Be Spudded Today.**

The Wonder State Development Company, operators of the Wilson farm near Woodson, will spud today a test well on 160 acres located one mile south of the Woodson Post Office. The well was located yesterday by J. H. Logan, state geologist, in the southeastern part of the county. The company expects to have the well in operation by the first of the year.

**OIL REFINERY TO BE OPERATED HERE**

OIL SPRING SEEN AS NOT IMPORTANT

**300-Barrel Capacity Plant Under Construction on Woodroad Street.**

Construction of an oil refinery capable of turning out 300 barrels of finish oil per day is being planned by the Wonder State Development Company located on Woodroad Street, near Culver city, center of the oil field around the Woodson Post Office. The refinery will be headed by William B. Ramey, who came to Little Rock from Memphis, Tennessee, where he was engaged in the oil business. The company also has a large oil field in the Woodson Post Office area.
