NEW PRODUCER IN OLD RAINBOW FIELD

Johnson Bros. and Carroll No. 1 - Reported Good for 300 Barrels

Special to the Gazette.
El Dorado, June 26 — The Johnson Bros. and Carroll No. 1 is in section 16, T. 13 N., R. 14 W., in the northeast quarter of the southeast quarter of section 16. The well was drilled to a depth of 2,350 feet and is flowing at a rate of 300 barrels per day. The well is a producer of oil, and the oil is a good grade. The well was completed by the Rainbow Oil Company, Inc., and is set for an initial test at 500 barrels per day.

NEW COMPLETIONS AT RAINBOW CITY

Half Dozen Wells To Be Bailed There in Few Days

Special to the Gazette.
El Dorado, June 25 — The new wells will be bailed in a few days, making a total of eight wells bailed in the Rainbow City field in a recent period. The wells are: No. 1 in section 16, T. 13 N., R. 14 W.; No. 2 in section 1, T. 13 N., R. 14 W.; No. 3 in section 1, T. 13 N., R. 14 W.; No. 4 in section 16, T. 13 N., R. 14 W.; No. 5 in section 16, T. 13 N., R. 14 W.; No. 6 in section 16, T. 13 N., R. 14 W.; and No. 7 in section 16, T. 13 N., R. 14 W.

RAINBOW CITY FIELD - CENTER OF ACTIVITY

Five Wells Brought In and Work Continues Despite Eight Failures

Special to the Gazette.
El Dorado, June 25 — Five new wells have been brought in to the Rainbow City field in the past week, bringing the total number of successful wells to 24. The wells were: No. 1 in section 16, T. 13 N., R. 14 W.; No. 2 in section 16, T. 13 N., R. 14 W.; No. 3 in section 16, T. 13 N., R. 14 W.; No. 4 in section 16, T. 13 N., R. 14 W.; and No. 5 in section 16, T. 13 N., R. 14 W.

HUNT NO. 2 GOOD FOR 1,000 BARRELS

Test Is Made of Well in the Rainbow City Pool

Special to the Gazette.
El Dorado, June 27 — The Hunt No. 2 well on the J. D. Gregory estate in section 16, T. 13 N., R. 14 W., in the Rainbow City field, was bailed today, making a flow of 1,000 barrels of high-grade oil per day. The well was drilled to a depth of 3,350 feet and is located in the northeast quarter of the southeast quarter of section 16. The well is a producer of oil and gas, and the oil is a good grade. The well will be set for an initial test at 1,500 barrels per day.

NEW WELL BAILED IN RAINBOW FIELD

Production Area Extended a Quarter Mile Southwest by Completion

Special to the Gazette.
El Dorado, June 26 — The new well bailed in the Rainbow City field in the past week was the Rainbow No. 1 well, located in section 15, T. 13 N., R. 14 W. The well was drilled to a depth of 2,350 feet and is flowing at a rate of 300 barrels per day. The well is a producer of oil, and the oil is a good grade. The well was completed by the Rainbow Oil Company, Inc., and is set for an initial test at 500 barrels per day.

NEW WELLS EXPAND RAINBOW FIELD

Area of Operation Extended More Than Mile and Half Southwest

Special to the Gazette.
El Dorado, June 30 — The Rainbow City oil field was extended more than a mile and half southwest by the completion of another well in the field. The well was bailed in section 20, T. 13 N., R. 14 W., and is located in the northeast quarter of the southeast quarter of section 20. The well was drilled to a depth of 2,350 feet and is flowing at a rate of 300 barrels per day. The well is a producer of oil, and the oil is a good grade. The well was completed by the Rainbow Oil Company, Inc., and is set for an initial test at 500 barrels per day.

Crude Oil Being Taken From Smokey Mountain

By W. L. Roberts

El Dorado, June 26 — Oil from the Smokey Mountain oil field is now being taken from the field by the Rainbow Oil Company. The well, located in section 16, T. 13 N., R. 14 W., is a producer of oil and gas, and the oil is a good grade. The well was drilled to a depth of 2,350 feet and is flowing at a rate of 300 barrels per day. The well was completed by the Rainbow Oil Company, Inc., and is set for an initial test at 500 barrels per day.

Gusher Blows In at Rainbow Field

New Well flowing 3,000 Barrels Per Day is First in Two Weeks

Special to the Gazette.
El Dorado, July 2 — The first gusher in the Rainbow City oil field in two weeks is the Rainbow No. 3 well, located in section 20, T. 13 N., R. 14 W., in the southwest corner of the northeast quarter of section 20. The well was drilled to a depth of 3,177 feet and is flowing at a rate of 3,000 barrels per day. The well is a producer of oil and gas, and the oil is a good grade. The well was completed by the Rainbow Oil Company, Inc., and is set for an initial test at 3,500 barrels per day.

The well was completed at a depth of 3,350 feet, and the oil is flowing from the top of the formation at a rate of 3,000 barrels per day. The well is a producer of oil and gas, and the oil is a good grade. The well was completed by the Rainbow Oil Company, Inc., and is set for an initial test at 3,500 barrels per day.

Due to the pending severance tax laws, the company planning on the Rainbow City oil field has decided to institute a severance tax on all oil produced from the field. The severance tax will be collected on all oil produced from the field, and the funds will be used to finance the development of the field.

The Rainbow City oil field is located in the southeast corner of the northeast quarter of section 16, T. 13 N., R. 14 W. The field is a producer of oil and gas, and the oil is a good grade. The field was discovered by the Rainbow Oil Company, Inc., and is set for an initial test at 3,000 barrels per day.

Due to the pending severance tax laws, the company planning on the Rainbow City oil field has decided to institute a severance tax on all oil produced from the field. **NEW COMPLETIONS AT RAINBOW FIELD**

Half Dozen Tests This Week

Slump in the Slump

1955-10-17

E. Dornado, July 7.—Although few completions were reported in the Rainbow oil field last week, indications are that the second week in July will see more than offset the start the month.

Two important completions were reported by the Refining Company's A. B. F. Gregory No. 1 in the southwest, southeast of section 1-17-14, and the well was developed also in the southeast, southwest of section 17-14. The well was closed in at 12 o'clock.

Other completions were reported by the West Bend Company's A. E. F. Marciniak No. 1, which was closed in at 3 o'clock on July 6th.

The company reported that the well will be on test for the next three weeks.

The company also reported that the well will be on test for the next three weeks.

The company also reported that the well will be on test for the next three weeks.

THIRD PRODUCER IN RAINBOW CITY FIELD

Weekly Record Raised With Addition of Sun's Schmidt No. 2.

El Dorado, July 31.—Rainbow City field has made the largest daily production of oil yet from the Schmidt well No. 2 drilled for Sun Oil Company in this territory. Drilled in the east side of the field, the new well is on the northwest of the Schmidt well No. 1, which produced 72,000 barrels in July. The new well is named for the Schmidt family, which has been active in the oil business in Oklahoma.

The new well is being worked up to its full potential and is expected to produce at least 300 barrels per day. It is located in the northeast part of the field, close to the boundary between Rainbow City and Lithiafield.

HUNT NO. 1 WELL—MAKING DRY GAS

Is Second Big Gasser Brought in on the Gregory Estate.

Spearfish, S. D.—Completion of the Hunt No. 1 well on the 2.40 acre Gregory estate, a half mile west of Spearfish, is bringing a new gas well and a large gusher. This is the second well of the Gregory estate, which was purchased by the Hunt family.

The well is located in the northeast part of the field, close to the boundary between Spearfish and Gregory.

LARGE GASSER FOR RAINBOW CITY FIELD

Mangolia Company’s Gregory No. 1 Estimated at 30,000,000 Cubic Feet.

Rainier, July 31.—Another big gas well was partially completed in the northeast part of the field. The Mangolia Company’s Gregory No. 1 well is estimated to produce 30,000,000 cubic feet of gas per day. It is located in the northeast part of the field, close to the boundary between Rainier and Gregory.

Mangolia Company’s Gregory No. 1 well was completed in the northeast part of the field. It is estimated to produce 30,000,000 cubic feet of gas per day. It is located in the northeast part of the field, close to the boundary between Rainier and Gregory.

NEW PRODUCER IN RAINBOW FIELD

New Producer in Rainbow Field Brought in 230 Barrels Daily.

El Dorado, Aug. 1.—The Holcomb & McFarland well No. 1 on the Kelly farm, northeast of El Dorado, is bringing in 230 barrels of oil per day. The well is located in the northeast part of the field, close to the boundary between El Dorado and Rainbow.

The new well is being worked up to its full potential and is expected to produce at least 300 barrels per day. It is located in the northeast part of the field, close to the boundary between El Dorado and Rainbow.

NEW 2,500 BARREL PRODUCER BORING

Ohio Oil Company Hits Black Gold at 2,992 Feet in Rainbow Field.

El Dorado, Aug. 1.—The Ohio Oil Company has begun drilling a new well on the Rainbow field, boring 2,992 feet into black gold. The new well is located in the northeast part of the field, close to the boundary between El Dorado and Rainbow.
TWO WELLS ADDED TO EL DORADO POOL

Three Other Tests Feature Activities for Week in South Arkansas.

Special to the Gazette.
El Dorado, Aug. 18.—Completion of two new wells is the latest in a series of good news from the oil field near El Dorado, as drilling continues below surface. The wells are the results of work by the Henry Rand and the Union Drilling companies.

The Henry Rand company, at its No. 2, 1 mile west of El Dorado, encountered a barrier of 2,600 feet of sand and was forced to spud out a new well 400 feet west and 600 feet north of the old well.

The Union Drilling company, at its No. 1, 1 mile west of El Dorado, encountered a 1,300-foot sand with no water and then drilled a new well 400 feet north and 1,300 feet west of the old well.

The completion of these wells is being handled by the Henry Rand company and the Union Drilling company, respectively.

The completion of these wells is being handled by the Henry Rand company and the Union Drilling company, respectively.
NO COMPLETIONS IN EL DORADO OIL AREA

Few New Wells Started as Activities in South Arkansas Slump.

Special to the Gazette.
El Dorado, Sept. 8.—The past week was one of the quietest in the El Dorado oil field. As a matter of fact, there were no completions and few new wells started.

The next test scheduled is that of the Oklahoma Oil Company on the No. 3 Hinkle, located in section 17-14, three miles south of El Dorado. If this well is completed, it will be the first of its kind in that field. The well is located in the southeastern part of the field, where most of the oil is contained in the clay formation at the base of the formation. It is expected to be completed in about two weeks.

DEAD WELL MADE TO PRODUCE AGAIN

Carroll Estate No. 2 Stages Comeback in Rainbow City Field.

Special to the Gazette.
Carroll, Sept. 8.—Another Rainbow City oil well made a comeback this week. The Carroll Estate No. 2, which had been abandoned as a dry hole, started producing again after being treated with nitrogen gas.

The well, located in section 6-17-14, has been treating with nitrogen gas for the past few weeks. The gas was injected into the well to increase the pressure and force the oil to the surface. As a result, the well started producing again, with a flow of 100 barrels per day.

FOUR WELLS ADDED TO RAINBOW FIELD

Giant Gasser and Three Small Oil Producers Completed During Week.

Principal Activity Confined in Drilling in Rainbow Field.

Special to the Gazette.
El Dorado, Sept. 8.—A total of four new wells were completed in the Rainbow City oil field during the week ended Sept. 8. The activity was entirely confined to the Rainbow City field, with no new wells started in the neighboring fields.

The largest gasser is located in section 17-14, and is a prolific producer of over 2,500 barrels per day. This well, which is a part of the Rainbow City field, is expected to be completed in the near future.

The second largest gasser is located in section 6-17-14, and is producing at a rate of over 1,500 barrels per day. This well, which is also a part of the Rainbow City field, is expected to be completed in the near future.

The third largest gasser is located in section 17-14, and is producing at a rate of over 1,000 barrels per day. This well, which is also a part of the Rainbow City field, is expected to be completed in the near future.

The fourth largest gasser is located in section 17-14, and is producing at a rate of over 750 barrels per day. This well, which is also a part of the Rainbow City field, is expected to be completed in the near future.

In addition to the four new gassers, three new small oil producers were completed during the week. These wells are located in sections 17-14, 6-17-14, and 17-14, and are expected to produce at rates of 250, 300, and 350 barrels per day, respectively.

ARKANSAS HOLDINGS IN OIL COMBINATION

New Corporation Will Operate Refinery at El Dorado.

New York, Sept. 27.—(U. P.)—A new independent oil company has been formed to take over the operations of the Arkansas Oil Company, which has been merged to form a new $5,000,000 company known as the Manhattan Petroleum Company. The new company will own and operate a new refinery at El Dorado, Ark.

The Manhattan Petroleum Company will own and operate the 500,000 barrels per day refinery, which will be one of the largest in the world. The refinery will be located on the Black River, about five miles west of El Dorado. The company will also own and operate a pipeline from the refinery to the Arkansas Oil Company's fields.

The new company will be capitalized at $5,000,000, with a paid-in capital of $2,500,000. The officers of the company will be B. S. Farnsworth, president; W. R. Hambright, vice-president; and W. H. Wilson, secretary.

**THREE NEW WELLS IN RAINBOW FIELD**

El Dorado, Oct. 17—Completion of two new oil producing wells and the extension drilling of an old well in the northeast part of the Rainbow City Field, has increased the oil production of this field to the extent that 3,000 barrels daily are being added to South Arkansas Oil Production.

The new well test is that of the Oil Well Company. Well No. 1 in the northeast section of the Rainbow City Field, and No. 2 in the southeast section of the field. These wells will probably be ready for production in the near future.

The three wells are in Rainbow City field, which is located in the northeast extension, where the oil production has increased the past month. The three wells will add approximately 2,500 barrels of oil and 7,500,000 feet of gas to the field.

The wild well, which has been closed for six months at 2,500 barrels of oil per day, has been completed and is in the northeast section of the Rainbow City Field, and is now producing 3,000 barrels per day. The well is located near the center of the Rainbow City Field and is now producing 3,000 barrels per day.

**GASSEY BROUGHT IN AT EL DORADO**

El Dorado, Sept. 17.—(Special to The Gazette.)—Completion of the Rainbow City field in the northeast section of the Rainbow City Field, has added 3,000 barrels daily to the total oil production of the field.

The new well test is that of the Oil Well Company. Well No. 1 in the northeast section of the Rainbow City Field, and No. 2 in the southeast section of the field. These wells will probably be ready for production in the near future.

**ONE NEW PRODUCER IN RAINBOW CITY**

Lion Company’s No. 4 Estimated at 500 Barrels Daily.

The new producer is located in the northeast section of the Rainbow City Field, and is now producing 500 barrels per day. The well is located near the center of the Rainbow City Field and is now producing 500 barrels per day.

TO VOTE ON UNION OF OIL COMPANY

Shreveport-El Dorado Pipe Line May Absorb Producing Concern

New York, Nov. 20.—(P.—Directory of the Shreveport-El Dorado Pipe Line Company, Inc., and Shreveport-Producing and Refining Company, Inc., have announced that they will hold a meeting on December 4th to decide whether or not to vote for the union of their respective companies. The meeting will be held at the Shreveport-El Dorado Pipe Line office, located at 500 Main Street, Shreveport. It is anticipated that the meeting will be attended by a large number of oil company representatives who are expected to vote in favor of the union. The union is proposed to combine the two companies into a single, larger company that would operate the Shreveport-El Dorado Pipe Line and the Shreveport-Producing and Refining Company under a single management. The proposed union is intended to increase efficiency and reduce costs by eliminating duplication of facilities and personnel. The merger would also allow the companies to better marketed their products and services. The companies have been in discussions for several months, and it is hoped that a favorable vote will be obtained at the meeting. The companies have also announced that they will begin negotiations with the National Labor Relations Board to bring the merger under the provisions of the National Labor Relations Act.

El Dorado, Jan. 24.--Another well was added to the Rainbow City field, northeast of El Dorado, with a flow of 300 barrels of oil per day.

**MIDWEST DEPT.**

The Midwest Department of Oil and Gas, which has attracted considerable attention as a well-known producer, has abandoned a new well and has directed the drilling equipment to another site.

The new well is located in the vicinity of several existing wells, and it is expected to add to the daily production of oil in the Rainbow City field.
FIVE SMALL WELLS ADD 300 BARRELS

South Arkansas Oil Interests
Now Centered on Wildcat Tests.

SPECIAL TO THE GAZETTE.

El Dorado, Feb. 28.--With five small completions, adding less than 300 barrels to the oil production of the South Arkansas Oil fields, the company has strengthened its position for obtaining wildcat permits to develop the frontier areas.

The new completions were as follows: The Clybourn, No. 2, section 29-11-6, T. P. 11-4, weld completion, 106. The O. N. S. No. 1, section 14-11-7, T. P. 11-4, 110 barrels. The O. N. S. No. 1, section 18-11-7, T. P. 11-4, 100 barrels. The O. N. S. No. 1, section 22-11-7, T. P. 11-4, 90 barrels. The Sandhills No. 1, section 22-11-7, T. P. 11-4, 90 barrels.

These completions have had the center of attention for the last week, as the district has been recently given the name "Clybourn." The field is located about eight miles southeast of the town of El Dorado.

One Completion in Rainbow Field.

Interest Centered on Wildcat Wells as Drilling Lulls at Field.

SPECIAL TO THE GAZETTE.

El Dorado, Feb. 27.--While one completion in the Rainbow Field was completed this week, the activity in the wildcat wells is still centered at this field.

The wildcat wells are still producing oil at an average rate of less than 100 barrels per day, and the completion reported this week took only 10 days to complete.

The completion was reported to be a good one, and the company expects to produce more oil from this well in the future.

The wildcat drilling activity at the Rainbow Field is still quite active, with several wildcat wells currently being drilled.

Gasser in Old East Field and Wildcats Attract Interest.

SPECIAL TO THE GAZETTE.

El Dorado, Feb. 25.--Two completions, one a big gasser from the Rainbow Field, the other a well in the southwesterly section of the Rainbow Field, have been reported.

The Rainbow Field, which is the largest field in the area, has been the center of attention for the last few weeks due to the production of several big wildcats.

In the Rainbow Field, the oil production has increased significantly due to the drilling of several new wells.

The wildcat wells in the Rainbow Field are still the focus of activity, with several new wildcat wells currently being drilled.

The Rainbow Field is expected to be a major producer in the future, with several new wells expected to come on line soon.

The wildcats in the Rainbow Field are still attracting interest, with several new wildcats expected to be completed in the near future.
