LARGE GASSEER IN AT RAINBOW CITY

Test With Big Flow Will Be Killed to Make Oil Well.

Special to The Gazette.

El Dorado, April 30.—Rainbow City oil producers have one of the biggest gassers in recent months late yesterday.

The peak is the Pedros No. 1 of the Oil Well Corporation in section 9-14-5. Drilled in a total depth of 3,502 feet, flowing 40 and 90 cubic feet of gas a day, and 180 barrels of oil per day, the well was reported today as a guaranty of Rainbow City being more than just a gas producer.

Company officials reported today the well will be killed and an attempt to stop the flow the well in an oil well.

The well is reported to have showed 1,500,000 gallons of water. The hole will be deepened slightly and the operators expect to get a good well for between 200 and 300 barrels of oil daily on final completion.

ANOTHER GUSHER IN RAINBOW FIELD

Ohio Company Completes Second Well Estimated at 6,000 Barrels.

Special to The Gazette.

El Dorado, April 29.—The Ohio Company has brought another gusher in the Rainbow field.

The well is the Pedros No. 1, located in the northeast quarter of section 2-14-16, and is considered to be a strong producer. The gusher producer resulted upon the completion of a test after 10 days of drilling, and the oil field is expected to develop into a large pool.

A new Rainbow field is being developed in the northwest quarter of section 2-14-16. The well is located on the east side of the gusher, and is expected to reach a depth of 2,000 feet in the next few days.

NEW POOL WELL COMPLETED

Flow Estimated at 100 Barrels of Oil and 5,000 Feet of Gas.

Special to The Gazette.

El Dorado, April 30.—The Oil Well Corporation has completed the Black Dorado No. 1 in the northeast quarter of section 3-14-16, located in the northwest quarter of the southeast quarter of section 4-14-16. The well is said to have flowed 100 barrels of oil per day and 5,000 feet of gas per day before being shut in.

The well is flowing from a new oil field, and the company expects to have the well flowing 500 barrels of oil per day when it is brought to a point for sale.

ONE COMPLETION IN STEPHENS AREA

Root Refiners, Tinkhamville No. 1 Only New Well in State This Week.

Special to The Gazette.

El Dorado, May 1.—With only one completion in this state this week, the Root Refiners, Tinkhamville No. 1, is a major production step for the Stephens area.

The well is located in the southeast quarter of section 2-14-16 and is said to have flowed 500 barrels of oil per day.

The Root Refiners, located in the northeast corner of the state, is expected to produce 1,000 barrels of oil per day from the newly discovered field.

NEW 1,560-BARREL WELL COMPLETED

Ohio Company Brings In Well in Northeast Rainbow Extension.

Special to The Gazette.

El Dorado, May 1.—The northeast corner of Rainbow field has scored another big well today when the Ohio Company has brought in a well in the northeast quarter of section 2-14-16.

The well is located on the northwest corner of the northeast corner of section 2-14-16, and is said to have flowed 1,560 barrels of oil per day.

The Root Refiners, located in the northeast corner of the state, is expected to produce 1,000 barrels of oil per day from the newly discovered field.

NEW LOCATIONS IN RAINBOW CITY AREA

Ten New Wells Expected to Be Completed in Rainbow City Area.

Special to The Gazette.

El Dorado, May 2.—Ten new wells are expected to be completed in the Rainbow City area in the near future.

The new wells are expected to increase the production of the Rainbow field to over 2,000 barrels of oil per day.

NEW LOCATION IN RAINBOW FIELD

Drilling Campaign Started in Semi-Circular Area to the Northeast.

Special to The Gazette.

El Dorado, May 1.—A new drilling campaign has started in Rainbow field to the northeast to increase production.

The new campaign is expected to increase production by over 500 barrels of oil per day.

INTEREST REVIVED IN RAINBOW FIELD

New Well Extends Oil Producing Area East in Northeast Section.

Special to The Gazette.

El Dorado, May 1.—A new well has been discovered in the Rainbow field, extending the producing area east in the northeast section.

The new well is located on the southeast corner of the northeast corner of section 2-14-16, and is expected to produce 200 barrels of oil per day.

The Ohio Oil Company is planning to drill another well in the area in the near future.

The well was brought in at a depth of 2,000 feet and is expected to produce over 500 barrels of oil per day.

The company is also planning to drill two more wells in the area to increase production.
ONE COMPLETION IN RAINBOW CITY AREA

New Well and Good Test Cause More Drilling in Northeast Section.

Special to the Gazette.

El Dorado, May 20—A promising oil well in Rainbow City field was put in production today, it was announced by the Rainbow Oil Company in a news release here. This is another of the many wells that have been drilled in the northeast area of Rainbow that has been developed over the past few years.

The new well, located on the northeast corner of 3rd Street and 2nd Avenue, was completed at a depth of 1,500 feet and is producing about 200 barrels of oil per day. The well was drilled by the Rainbow Oil Company using its own equipment and personnel.

This latest addition to the Rainbow City field brings the total number of producing wells in the area to over 20. The field has been producing oil since 1924 and is considered one of the most prolific in the area. The company continues to explore and develop new areas in the field to increase production.

STANDARD TO BUY HUMBLE OIL WELLS

Dealing Involving 150 Producing Oil Wells to Become Effective June 1.

Special to the Gazette.

El Dorado, May 20—A deal involving the purchase of 150 producing oil wells from Humble Oil and Refining Company in southwest Arkansas has been announced by. the Rainbow Oil Company in a news release. The deal will become effective on June 1.

The Rainbow Oil Company has entered into an agreement to purchase 150 producing oil wells located in the southwest Arkansas field from Humble Oil and Refining Company. The wells are spread throughout the field and are expected to increase the Rainbow Oil Company's production capacity.

The Rainbow Oil Company is a well-established and successful oil producer in the region, and the acquisition of these wells will further strengthen its position in the market. The company is committed to ongoing exploration and development efforts to ensure continued growth and success.

NO COMPLETION IN RAINBOW OIL AREA

Interest and Drilling Continues at Five Wells in New Extension.

Special to the Gazette.

El Dorado, May 20—Although the South Arkansas oilfield was inactive early this week, important completions were made on several wells in the area. The Rainbow Oil Company has completed five wells in this area, each of which has shown promising results.

The first well, located on the northeast corner of 3rd Street and 2nd Avenue, was drilled by the Rainbow Oil Company and completed at a depth of 1,500 feet. The well is producing approximately 200 barrels of oil per day and has a potential for even higher production in the future.

The second well, located on the southeast corner of 4th Street and 1st Avenue, was drilled by the Rainbow Oil Company and completed at a depth of 1,200 feet. This well is producing approximately 150 barrels of oil per day and is expected to increase in production with further development.

The third well, located on the northwest corner of 3rd Street and 2nd Avenue, was drilled by the Rainbow Oil Company and completed at a depth of 1,300 feet. The well is producing approximately 250 barrels of oil per day and has a potential for increased production with further exploration.

The fourth well, located on the southwest corner of 4th Street and 1st Avenue, was drilled by the Rainbow Oil Company and completed at a depth of 1,100 feet. This well is producing approximately 100 barrels of oil per day and is expected to increase in production with further development.

The fifth well, located on the northeast corner of 2nd Street and 1st Avenue, was drilled by the Rainbow Oil Company and completed at a depth of 1,400 feet. The well is producing approximately 150 barrels of oil per day and has a potential for increased production with further exploration.

The Rainbow Oil Company is committed to ongoing exploration and development efforts to ensure continued growth and success in the area. The company is dedicated to responsible and environmentally friendly oil production practices and is committed to providing the highest quality products to its customers.

FLOW INCREASES IN NEW RAINBOW WELLS

Ohio Company's Gusher Jumps From 200 to 500 Barrels Per Day.

Special to the Gazette.

El Dorado, June 8—The Rainbow Oil Company, located in the northeast corner of 3rd Street and 2nd Avenue, has announced a significant increase in production from one of its wells. The well, located in the southeast corner of 4th Street and 1st Avenue, has increased its production from 200 barrels of oil per day to over 500 barrels per day.

The Rainbow Oil Company has been active in the area for several years and has completed numerous wells in the region. This latest increase in production is a testament to the company's commitment to ongoing exploration and development efforts. The company is dedicated to providing the highest quality oil products to its customers.

ANOTHER PRODUCER IN RAINBOW FIELD

H. M. Nash No. 1 of Pure Oil Company Estimated at 1,500 Barrels.

Special to the Gazette.

El Dorado, June 8—Another well is being drilled in the northeast corner of 3rd Street and 2nd Avenue by the Pure Oil Company. The location of the well is in the southwest corner of 4th Street and 1st Avenue.

The Pure Oil Company has been active in the area for several years and has completed numerous wells in the region. This latest well is expected to increase the production capacity in the area. The company is dedicated to ongoing exploration and development efforts to ensure continued growth and success in the area. The company is committed to responsible and environmentally friendly oil production practices and is dedicated to providing the highest quality products to its customers.

ONE COMPLETION IN RAINBOW EXTENSION

H. M. Nash No. 1 Makes 500-Barrel Gusher and Tests Are Features of New Extension.

Special to the Gazette.

El Dorado, June 8—The Rainbow Oil Company in the northeast corner of 3rd Street and 2nd Avenue, has completed another well in its new extension. The well, located in the southeast corner of 4th Street and 1st Avenue, was completed at a depth of 1,500 feet and is producing approximately 500 barrels of oil per day.

This latest well is a significant milestone for the Rainbow Oil Company and is expected to increase the production capacity in the area. The company is dedicated to ongoing exploration and development efforts to ensure continued growth and success in the area. The company is committed to responsible and environmentally friendly oil production practices and is dedicated to providing the highest quality products to its customers.

Root Refining Buys $250,000 Worth of Arkansas Leases.

Special to the Gazette.

El Dorado, June 17—The Root Refining Company, located in the northeast corner of 3rd Street and 2nd Avenue, has acquired $250,000 worth of Arkansas leases. The company has made a significant investment in the area and is expected to continue to increase its production capacity.

The Root Refining Company is committed to ongoing exploration and development efforts to ensure continued growth and success in the area. The company is dedicated to responsible and environmentally friendly oil production practices and is committed to providing the highest quality products to its customers.

NUMEROUS WILDCAT WELLS ARE DRILLED

Operators Hope for New Field in Union or Adjacent Counties.

Special to the Gazette.

El Dorado, June 30.—Outside of wildcat operations and the recent building of a pipeline, the oil industry in this area consists of old wells, the past week was an exceptionally quiet one. An attempt was made to drill two new wells, but only the first was completed.

The latest plot of land to be drilled in Union and adjoining counties, the Hendricks property, is on the west side of the Pipeline road. A new well was drilled by W. C. Hendricks, Jr., in the southeast quarter of section 13, T. 16 N., R. 11 W., and this is estimated to be the last well drilled in the area for several years. A small lease has been sold to H. B. Rowland.

DRILLING ACTIVE IN EL DORADO FIELDS

Many Old Wells Being Deep-Plugged or Drilled Back.

By C. S. Ester.

El Dorado, June 30.—The oil industry is showing signs of life in the El Dorado oil fields. A large number of old wells are being drilled back and deep-plugged, and many others are being abandoned.

The latest plot of land to be drilled in the field is on the north side of the Pipeline road, near the southeast corner of section 12, T. 14 N., R. 11 W. A new well has been completed by W. C. Hendricks, Jr., in the southwest quarter of section 12, T. 14 N., R. 11 W. This well is estimated to be the last well drilled in the area for several years. A small lease has been sold to H. B. Rowland.

LITTLE ACTIVITY IN EL DORADO FIELDS

Wildcats and Old Tests Only Wells Worked This Week.

By C. S. Ester.

El Dorado, June 30.—Outside of the drilling of a few new tests and the building of a pipeline, the oil industry in the area consists of old wells, most of which are in the El Dorado oil field.

The latest plot of land to be drilled in the field is on the south side of the Pipeline road, near the northeast corner of section 12, T. 14 N., R. 11 W. A new well has been completed by W. C. Hendricks, Jr., in the southeast quarter of section 12, T. 14 N., R. 11 W. This well is estimated to be the last well drilled in the area for several years. A small lease has been sold to H. B. Rowland.

SECOND WELL FOR CITY OF SMACKOVER

Wilson & Chapman's Robert William Bradley No. 1 put to use as Producer.

Special to the Gazette.

El Dorado, Aug. 17.—Completion of a second well by Wilson & Chapman, a newly developed oil pool in the Smackover field, was announced yesterday. The well is the second for the city of Smackover.

The new well is located at the southeast corner of section 16, T. 14 N., R. 11 W., and is in the northwest corner of section 16, T. 14 N., R. 11 W. It is a wildcat well, and is now producing at a rate of several barrels of oil per day. The well is expected to be completed in the near future.

NEW DEEP SAND IN UNION COUNTY

Wildcat on J. M. McDuffe Farm 1,000 Feet Below Productive Levels.

By C. S. Ester.

El Dorado, Aug. 18.—Interest in a deep sand well in the Union County area was shown by the completion of a wildcat well on the McDuffe farm near the southeast corner of section 14, T. 14 N., R. 11 W. The well is located on a lease owned by J. M. McDuffe, and is estimated to be the deepest well drilled in the area for several years. A small lease has been sold to H. B. Rowland.

EL DORADO FIELD HAS QUIET WEEK

No Consequences of Consequence in South Arkansas Oil District.

N. C. O., Nov. 1, 1911, the Arkansas Journal.

EL DORADO, Ark., Oct. 24—A week's quiet prevails in this section, and the absence of any news of consequence is evident.

The last week's activity was centered around the well operated by the El Dorado Oil Company, located about one mile west of El Dorado, and one mile north of the town. This well was drilled by C. E. boutique, and has been producing gas and oil for the past several months. The well is now being worked over by a crew of men, and is expected to come in at any time.

Wilson & Company, operators of the El Dorado Oil Company, have reported that the well is producing a mixture of gas and oil, and that the flow is increasing daily.

INTEREST IN SOUTH ARKANSAS DIVIDED

Urbana, Hillsboro and Rainbow Pools Make Good Showings.

Special to the Gazette.

El Dorado, Feb. 14.—Interest in South Arkansas oil activities increased in three directions this week, with the new Urbana deep oil pool taking the lead. In addition, the Rainbow-Pool Company near Hillsboro, and the Oleo-Pool Company near Rainbow, both good wells completed this week.

The Marcella Oil Co. of Searcy, in its Thompson well in section 18-15-5, showed a large increase in production when a swabber was run for the first time this week, and the well is now producing about 450 barrels per day at intervals of every hour or less. When the swabber was run the well, which had been shut in for several months, showed an average rate of production of 250 barrels per day, and the amount of oil and gas that showed up caused considerable agitation among the workers, who expected a much larger amount of oil and gas to be produced. The well is expected to put in a good showing within the next few days.

The Marcella Oil Co.'s two new drills are making good progress, and are expected to be completed by the end of the week. The first well is in section 16-15-5, and the second is in section 12-15-5.

The new drills have been made by the Marcella Oil Co., in all sections 18-15-5, and the Federal Petroleum Co. will drill one well on the Union Savannah Company's land. The other locations have been made by the Federal Petroleum Co., and all work has been completed by the Federal Petroleum Co., except in section 9-18-15-5, where work is expected to be completed by the end of the week.

The first pipe line into the new field at Urbana is being laid from the Rainbow-Pool Company's drill site to the Shreveport-R. E. Dorado Pipe Line Company's plant at Rainbow. A large amount of pipe has already been built on the Marcella trails, and work is expected to be completed by the end of the week.

The new shallow oil pool recently discovered in the southern part of the county is being developed by the Rainbow-Pool Company, and is expected to produce large quantities of oil and gas. The company has received considerable interest in the pool, and has already drilled several wells in the area. The company has a large number of leases in the area, and is expected to produce large quantities of oil and gas in the near future.

RENEWED ACTIVITY IN URBANA FIELD

Three Locations Made, Pumping Rig Erected and Permit Issued.

Special to the Gazette.

El Dorado, Feb. 6.—Getting off to a flying start this week are the Rainbow-Pool Company, which is making good progress at its three new locations. The company is standardizing its rig in the discovery well, which is expected to produce large quantities of oil and gas in the near future.

The Marcella Oil Co. is making good progress at its two drills, and is expected to be completed by the end of the week. The first well is in section 16-15-5, and the second is in section 12-15-5.

TWO RIGS STARTED IN UNION COUNTY

Work on Two Derricks Also Begun and Four Locations Made.

Special to the Gazette.

El Dorado, Feb. 12.—Two drilling rigs were being set up this week at two of the Union Savannah Company's new oil fields, and four locations were being made by the company at its four new drill sites.

The Marcella Oil Co.'s two new drills are making good progress, and are expected to be completed by the end of the week. The first well is in section 16-15-5, and the second is in section 12-15-5.

PROGRESS IS SHOWN IN PROVEN FIELD

Pipe Line Into Hillsboro Area and Starting of New Tests Feature Week.

Special to the Gazette.

El Dorado, Feb. 12.—Marked progress in two new drilling operations in proven fields, and the building of a pipe line into the Hillsboro area, were featured this week. The workers, however, are expected to get started early next week.

In the Hillsboro area, where work has been started and material is being moved in for new production, the line from the Whitefield field will be completed Monday.

Johnathan Farming Company, on its Sells, No. 1 test in the northwest corner of section 19-18-15-5, on an 150-acre tract about 2 miles north of the town of the Hillsboro field, is expected to be started early next week.

The discovery well of the Marcella oil field, the Thompson 3-9-5, is being worked over at this time, and is expected to be completed by the end of the week.

The discovery well at the summit of the hill, the Thompson 9-9-15-5 is being worked over, and is expected to be completed by the end of the week.

The sand in this new field was found at a depth of 3,883 feet.
WELL COMPLETED IN URBANA FIELD

Estimated Production of New Producer Is Estimated at 700 to 1,000 Barrels.

**Results Will Indicate Trend of Deep Pool:** Lion Strikes Pay Sand.

**Two Urbana Wells Occupy Limelight**

**Urbana Deep Tests Are Disappointing**

However, 5,000-Foot Tests Will Be Made on Two Wells.

Some in the business are pessimistic. They predict the wells will be dry. Others feel the wells may produce.

**In the Sunflower creek field, Wilson and Chapman boys are testing a new breed of drills. The drills are said to be the latest in the business. The company is also drilling on the Goodwin farm.**

The company has recently tested several new oil wells, one of which is located in the southeast of the El Dorado business section.

The two wells in the deep oil pool, which has been drilled by the Sunflower creek field, are 2,500 feet below the surface of the field. The wells are 1,500 feet north of the Sunflower creek field.

The wells are now being completed and will be ready for production early next week.

ONE COMPLETION IN EL DORADO AREA

Oil Field Experiences Another Dull Week: Urbana Shallow Test Holds Interest.

Special to The Gazette.
Urbana, May 17—With only one new completion and operations confined to the southern part of the field, another rather quiet week in the southern well sand test in the Urbana area, 13 miles southeast of El Dorado, brought in 3,200 to 2,370 barrels. Indications are that the well is a rather thin formation and the gas will be flared and burned off, but the well may be one of the best of the season and the production possibly be of a large nature.

The well is located 1 mile east of the Urbana 14 miles southeast of El Dorado and is the 14th well to be drilled in the field. Two other wells are still drilling and are about 500 feet south of the Urbana No. 1 well. The test is a shallow sand and will be tested in the future.

The well is located on the Norton ranch, owned by C. F. Norton and was drilled by the Norton Oil Co. of Urbana. The well was completed at a depth of 2,300 feet and will be connected to the line by a 20-inch line.

The well is located on the Norton ranch, owned by C. F. Norton and was drilled by the Norton Oil Co. of Urbana. The well was completed at a depth of 2,300 feet and will be connected to the line by a 20-inch line.

ONE COMPLETION IN EL DORADO AREA

G. G. Simmons Well Estimated at 300 Barrels Daily.

Eldorado, May 15—The fourth well to be completed in the Urbana area, 14 miles southeast of El Dorado, has been completed in the W. E. Simmons and Sons Oil Co. well on the western side of the field.

The well is located on the eastern side of the Urbana 14 mile south of the Urbana No. 1 well and was drilled by the Norton Oil Co. of Urbana.

The well is located on the Norton ranch, owned by C. F. Norton and was drilled by the Norton Oil Co. of Urbana. The well was completed at a depth of 2,300 feet and will be connected to the line by a 20-inch line.

SMACKOVER AREA TO HAVE DEEP TESTS

2,000 Acres of Leases Being Blocked for Shreveport Operators.

Special to the Gazette.
El Dorado, June 14.—A long-expected announcement regarding the development of crude oil from the 4,000 feet deep Smackover in the field will be made here several days, a visit by an eye for operators who are planning on starting for a well within the next 30 days.

Two wells will be drilled, one of which will be a 4,000 foot well at a shallow depth, to be located in the same block as the 14-18-16 well. The other will be a 1,600 foot well, located at a shallower depth, to be drilled at a cost of $100,000, and will include a tank, pump, wellhead, and other necessary equipment.

URBANA DEEP WELL IS EXTENDED EASY

Winn Test Is First Producer Any Distance From Discovery Well.

Special to the Gazette.
El Dorado, June 21.—The Urbanada well is located in the heart of the 14-18-16-16, 4,000 feet deep in the Smackover formation, and is operated by the Winn Oil Company, which has been drilled to a depth of 1,600 feet, and is now producing at a rate of 100 barrels per day.

LIGHT OPERATION IN OIL DISTRICT

Winn Test is First Producer Any Distance From Discovery Well.
